Fu Calculation (Mini Points)

All hands start with a base of 20 fu. Each additional source of fu is added to the total, then the value is rounded up to the nearest 10.

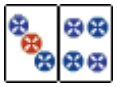

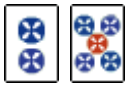

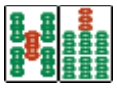

Triplets / Quads

Type	Simples	Terminals / Honors
Open Triplet (Minkou)	2 fu	4 fu
Closed Triplet (Ankou)	4 fu	8 fu
Open Kan (Minkan)	8 fu	16 fu
Closed Kan (Ankan)	16 fu	32 fu

A tip for memorization:

- Each triplet is worth 4 fu; halved if open, and doubled if a terminal/honor.
- Each kan is worth 16 fu; halved if open, and doubled if a terminal/honor.

Waits

Type	Value	Example
Open Wait (Ryanmen)	0 fu	 waits: 
Dual Pair Wait (Shanpon)	0 fu	 waits: 
Closed Wait (Kanchan)	2 fu	 waits: 
Edge Wait (Penchan)	2 fu	 waits: 
Pair Wait (Tanki)	2 fu	 waits: 

Complex waits are always comprised of multiple different basic waits, and will be scored as a basic wait upon winning.

When a hand can be interpreted in multiple ways the interpretation that scores the most points is used.

The Pair

If the hand's pair would score a yaku as a triplet, then it scores 2 fu.

If the pair is both the round win and the seat wind, then it may score 2 fu or 4 fu, depending on the rules used.

Win Condition

Winning by Ron with a closed hand scores 10fu.

A win by tsumo, whether open or closed, is worth 2 fu. There are only two notable exceptions:

- If the hand qualifies for pinfu, these 2 fu are waived.
- In a few scoring variations, a win by dead wall draw is also ineligible for the +2 fu from tsumo.

Special Cases

- Seven Pairs hands are always fixed at 25 fu.
- If an open hand has no other fu (is at 20 fu), it is set to 30 fu.
